01 Engaging

Copy

We asked. You didn't. But we're telling you anyway — relentless wins every time.

#Nike #AskUs

80/280

02 Promotional

Copy

Not all fashion & lifestyle brands are built the same. Some of us just do it iconic.

#Nike #NewDrop

84/280

03 Witty

Copy

Not everything great needs an introduction. Us: be responsible. Also us: Fashion & Lifestyle products and services at 2am. No regrets.

#Nike #JustSaying

134/280

04 Informative

Copy

Fun fact: relentless isn't a feature. It's a philosophy. Here's what that means for you.

#Nike #DidYouKnow

88/280

05 Conversational

Copy

Real talk — when did fearless become optional? We never got that memo.

#Nike #RealTalk

FILTER: **All** Engaging Promotional Witty Informative Conversational Meme Value

01 **Engaging** Copy
Some upgrades are non-negotiable. What's your biggest flex this week? We'll wait. 🍷
#Zomato #AskUs 84/280

02 **Promotional** Copy
Some upgrades are non-negotiable. Meet the hungry way to Food & Beverage products and services. Your routine just levelled up.
#Zomato #NewDrop 126/280

03 **Witty** Copy
Plot twist: the delicious option was available all along.
#Zomato #JustSaying 57/280

04 **Informative** Copy
Here's what most food & beverage brands won't tell you: obsessed matters more than the price tag.
#Zomato #DidYouKnow 97/280

05 **Conversational** Copy
This one's worth every penny. Okay but can we normalise expecting obsessed things? Minimum standard. Not a luxury.
#Zomato #RealTalk 114/280

06 **Meme style** Copy
Me before Food & Beverage products and services: fine. Me after: unreasonably attached.
#Zomato #Mood 87/280

07 **Value-driven** Copy
Quality isn't a price point. It's a decision made before you ever see the product.
#Zomato #BuildBetter 87/280

08 **Engaging** Copy
Rate your food & beverage experience this week: 🍷 or 🤖?
#Zomato #AskUs 57/280

2. Approach Document

How I Analysed Brand Voice

Brand voice is auto-detected through a 3-level priority system:

1. **Known Brand Recognition** — A database of 50+ popular brands (Zomato, Nike, Apple, CRED, Nykaa, Netflix etc.) with hand-researched profiles containing tone, adjective vocabulary, target audience, content themes, and brand personality description.
2. **Industry Inference** — If the brand is unknown, the system maps the selected industry to a tone profile. For example, Food & Beverage → "Fun & Craveable", Tech & SaaS → "Smart & Innovative", Beauty → "Glam & Empowering".
3. **User Override** — Users can manually select up to 3 tone chips to override auto-detection when needed.

How I Structured the Logic

Instead of using an AI model or API, I built a **rule-based template engine** with 3 components:

- **Brand Profile Store** — 50+ profiles with tone, adjectives, audience, themes and personality per brand/industry
- **Tweet Template Library** — 70+ creative templates across 7 style categories (Engaging, Promotional, Witty, Informative, Conversational, Meme-style, Value-driven)
- **Dynamic Substitution** — Templates are filled at runtime with brand-specific adjectives, product context, and objective-based angle modifiers

Each generation produces 10 tweets — no two share the same format or structure, ensured by anti-repetition logic that rotates templates and randomises adjective selection.

Tools Used

Layer	Tool
Frontend	HTML, CSS, Vanilla JavaScript
Backend	Python, Flask, Flask-CORS
Generation	Rule-based engine (no AI model)
Version Control	GitHub
Backend Hosting	Render.com
Frontend Hosting	Netlify
